# STOP THE BITES PLUS!

Advanced Mosquito & Tick Killer

**Stop The Bites! ®**

**Vs**

**Stop The Bites PLUS! ®**

Lemongrass and Cedarwood

**ESSENTIAL OILS**

**Citronella, Peppermint, and Cinnamon**

Provides kill, slower overall lethality, no long term repellency

**KILL STRENGTH**

**High-potency kill on contact** and stress responses from cinnamon and peppermint oils — insects are incapacitated faster

Repellent effect primarily from geraniol; effective but more transient

**REPELLENCY**

**Enhanced behavioral deterrence** — peppermint + citronella provide strong deterrence and stress response

Slower kill, no repellency

**SPEED**

**Immediate impact** — peppermint's sensory disruption triggers rapid insect response, cinnamon amplifies contact effects

Moderate residual performance, reliant on surface oils which can wear off faster

**RESIDUAL**

**Extended residual activity** — essential oils continue acting as they volatilize more slowly and are supported by natural adhesion

Moderate ability on ticks; primarily repellent rather than strong contact control

**TICK**

**Superior tick disruption** on contact due to cinnamon + peppermint synergy

Preventative-focused system with less aggressive control and shorter lasting effects

**RESULT**

**Comprehensive control system** — fast kill + repellency + residual suppression
