

PRECAUTIONARY STATEMENTS

Causes mild eye irritation. Do not apply this product if bees or other pollinators are foraging in the treatment area.

FIRST AID

General: Call a poison control center or doctor for treatment advice. Have the product containers or label with you when calling a poison control center or doctor or going for treatment. **If in Eyes:** Call a poison control center or doctor for treatment advice. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. **If on Skin:** Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Wash contaminated clothing before reuse. Call a poison control center or doctor for treatment advice. **If inhaled:** Remove victim to fresh air and keep at rest in a position comfortable for breathing. If breathing is irregular or stopped, administer artificial respiration. Call a poison control center or doctor for treatment advice. **If Swallowed:** Call a physician or poison control center immediately. Drink one or two glasses of water. Do not induce vomiting without medical advice. Never give anything by mouth to an unconscious person.

For medical emergencies involving this product call toll-free 1-800-222-1222.

DIRECTIONS FOR USE

Read entire label before using. Use only according to label Precautionary Statements and Directions.

Before buying or using this product read “Conditions of Sale and Warranty” found elsewhere on this label.

Shake or Agitate Well Before Using

To kill flies and ticks for application through spray systems in livestock environments.

To Kill Flies and Ticks on Cattle

Dilute concentrate with water prior to application.

- Quart dilution: Mix 1.5 fluid ounces of concentrate with 1 quart of water.
- Gallon dilution: Mix 6 fluid ounces of concentrate with 1 gallon of water.

Apply using a pressure sprayer to thoroughly wet the animal's coat. Product may also be applied by tank dipping.

- May also be applied through custom dairy spray systems calibrated to deliver the equivalent of 6 fluid ounces of concentrate per gallon of water.
- Ensure spray equipment is properly calibrated to thoroughly wet the animal's coat without excessive runoff.

Repeat treatment at intervals of 5 to 12 days, or as reinfestation warrants.

Do not directly spray cattle feed, food, or water sources.

To Kill Flies and Ticks in Cattle Areas

Dilute concentrate with water prior to application.

- Quart dilution: Mix 1.5 fluid ounces of concentrate with 1 quart of water.
- Gallon dilution: Mix 6 fluid ounces of concentrate with 1 gallon of water.

Apply using a pressure sprayer to areas around cattle, barns, and other locations where flies and ticks may congregate or emerge at the rate of 1,000 sq. ft. per gallon of solution. Repeat as reinfestation warrants.

HerdArmor™
